## EDUCATION

### COCHIN UNIVERSITY OF SCIENCE AND TECHNOLOGY

Bachelor of Technology - Computer science engineering; GPA: 7.6

Kerala, India

July 2018 - June 2022

## SKILLS SUMMARY

- **Languages:** JavaScript (ES6+), Typescript, HTML5, CSS3
- **Frameworks & Libraries:** ReactJS, Zustand, Vue.js, React Query
- **Build Tools:** Webpack, Vite
- **Backend Exposure:** Node.js, Laravel
- **Version Control:** Git, GitHub
- **Testing:** Jest, Vitest
- **Other Tools:** Docker, Linux, CI/CD, Nginx, Productivity Tools (ChatGPT, Cursor, Claude.ai)
- **Soft Skills:** Fast learner, Creative Problem Solver, Team Collaborator, Clear Communicator

## PROFESSIONAL SUMMARY

Full-Stack Developer with 3+ years of experience building performant SaaS products using React, Vue, and Node.js. Focused on modern frontend architecture, seamless user experiences, and scalable application design. Currently deepening full-stack skills with backend services in Laravel and Node.

## EXPERIENCE

### Mozilor (CookieYes)

Software Engineer

Hybrid

Nov 2022 – May 2025

- Led a major frontend migration from Vue.js to ReactJS to address performance bottlenecks and enhance long-term maintainability, setting up architecture for authentication, routing, and state management using React Query and Zustand.
- Reduced app bundle size by 35% and improved load time by over 1.5s through Webpack and Vite optimizations, enhancing UX for millions of users.
- Built reusable, modular UI components and integrated them with RESTful APIs for real-time updates and seamless data flow.
- Implemented frontend logic for pricing strategies with feature-level access control based on subscriptions.
- Led UI updates for compliance (GDPR/CCPA) including banner behavior, policy display, and cookie categorization.
- Revamped system-generated email templates for improved engagement and clarity.
- Contributed to backend microservices using Node.js and Laravel, integrating frontend data pipelines.
- Maintained test coverage with Vitest/Jest and enforced code quality via rigorous PR reviews.
- Participated in Agile sprints and collaborated cross-functionally with designers, PMs, and backend engineers.
- Supported product and support teams during critical compliance updates, contributing to CookieYes CMP's Google Gold Certification through rapid issue resolution and feature enhancements.
- Diagnosed and resolved customer-facing banner issues (e.g., CSS/script conflicts, rendering failures) using browser DevTools—improving UI reliability and cross-browser consistency.
- Worked with version control using Bitbucket—managed branching, merging, and pull requests in a collaborative Agile environment.
- Contributed to backend development of microservices using Node.js and Laravel—integrating frontend data flows and expanding full-stack proficiency.
- Leveraged AI tools (ChatGPT, Cursor) to enhance development efficiency, problem-solving and continuously upskill in modern web technologies.
